

CAN WE GET MONEY OUT OF CURRENTLY FREE LISTINGS?

For many years WCOCA has tried to make its web site and maps a resource for visitors (and natives too). This has led to having about 140 free listings on map and web site. These free listings are mostly non-profits such as churches, charities & public service organizations. Other non-profits include art organizations, museums & points of interest. A small number (map only) are for-profit businesses that visitors may need or for which we get frequent requests such as airport, railroad, hospital, drug store, auto repair & horseback riding. (See list at end).

From time to time the question has been raised – can we get some of those listed to help support WCOCA.

Random points to consider:

- Most of the ones from which we are looking to get money are the ones who often ask WCOCA and the town for money.
- We need some of these more than they need us.

What clear and convincing policy change might we write that would distinguish those that we might get to pay from all the others?

- What might induce them to pay?
- As we are also working on creating a Business Improvement District that would legally require most all in commercial district to pay their fair share, we might want to consider that working on that might be the best use of our energies???

See list of organizations on next page.....
